SOP-7

Siren Response — With Infant

Baby 0–18 months · What to do when the Red Alert sounds

Rule #1 in every scenario: PICK UP THE BABY FIRST. Hold against your chest. Everything else is secondary. Leave the stroller behind.

🌙 Night — Baby Sleeping, No Mamad

1. Go straight to baby's room, **pick them up**
2. Do **NOT** get dressed first — baby then shoes/keys
3. If both parents: one takes **baby**, one takes go bag + torch
4. Shelter or stairwell or inner room — **hold baby**, sit down
5. **Wait 10 minutes** — baby may cry, that's OK

Pre-pack a blanket to grab with baby · Room-share during escalations for faster response

🚶 Outside / Walking with Stroller

1. Take baby **OUT of stroller** — hold against chest
2. **LEAVE** the stroller behind
3. Enter nearest **solid building** — stairwell or inner room
4. If no building: **lie face down**, baby under you, shield with body
5. **Wait 10 minutes**

Baby carrier is better than stroller for siren readiness outdoors · Know shelters on regular routes

🚗 Driving — Baby in Car Seat

1. **Pull over**, hazards on, engine off
2. **Unbuckle** harness and lift baby out (faster than detaching seat)
3. **Exit car** — hold baby against chest
4. Enter **building** if reachable, or lie on ground shielding baby
5. **Wait 10 minutes**

Practise unbuckling the harness quickly · Two adults: one grabs baby, one grabs nappy bag

🚌 On a Bus

1. Hold baby securely — take **OUT of stroller**
2. **Exit bus** when doors open — leave stroller on bus
3. Enter nearest **building**
4. If none: move away from bus, **lie on ground** shielding baby
5. **Wait 10 minutes**

Ask other passengers for help if needed

🏢 In a Public Building (Mall, Clinic, Office)

1. **Pick up** baby — OUT of stroller
2. Follow signs/staff to designated **shelter**
3. No shelter? **Stairwell** centre. No elevator.
4. Sit against **inner wall**, shield baby, away from glass
5. **Wait 10 minutes**

At Tipat Halav (baby clinic): ask staff for shelter immediately · You can carry while breastfeeding

Go Bag — Infant Additions

Nappies + wipes · Pacifier · Bottle or formula (pre-measured) · Muslin/blanket · Change of clothes · Snack (if weaning) · Baby carrier (wrap or structured) · Any medication

DISCLAIMER: Not an official government resource. Use at your own risk. Based on HFC (Pikud HaOref) publications as of 12 Mar 2026. Official guidance: oref.org.il. Always wait 10 min.
