SOP-8

Choosing a Protected Space

Decision Flowchart — Home Front Command Guidelines

When a Red Alert sounds, follow this chart. Choose the **highest-priority** option you can reach **within the time available**. Always **wait 10 minutes** before leaving.

Stairwell positioning: 3+ floors: at least **2 floors above you**. 3-storey building: **middle floor only**. Stay **on the staircase**, not in the hallway. Poured concrete structural core — proven to save lives.

Mamad sealing: Close blast door tightly (handle 90°). Close external **steel** window and internal **glass** window. If glass window has two wings: **remove both wings** during escalation periods and store outside room (they cannot seal properly when closed).

NOT valid protected spaces: Kitchen · Bathroom · Toilet · Building entrance lobby · Caravans / prefab structures · Areas with ceramics, porcelain, or glass that could shatter

DISCLAIMER: Not an official government resource. Use at your own risk. Based on HFC (Pikud HaOref) publications as of 12 Mar 2026. Official guidance: oref.org.il.
